Multi-Stage Adaptive Testing vs Item Level Adaptive Testing

	Multi-Stage Adaptive Testing (MST)	Item Adaptive
Test Delivery	Sets of questions (called modules)	One item at a time
Adaptive	Based on how students perform in the previous module	Based on a student responds to each question
Navigation	Students can review items within a module	Students are not able to go back to a question
Test Length	Supports shorter test lengths	Supports shorter test lengths
Examples	GRE, digital SAT	ACCUPLACER, SBAC, NWEA – MAP, NCLEX

Benefits of Multi-Stage Adaptive Testing

- ✓ Shorter tests
- ✓ Questions are tailored according to students' achievement
- ✓ Allows students to navigate back to questions within a module
- ✓ More secure testing
- ✓ Allows disruptions in internet connectivity
- ✓ More precise measurement

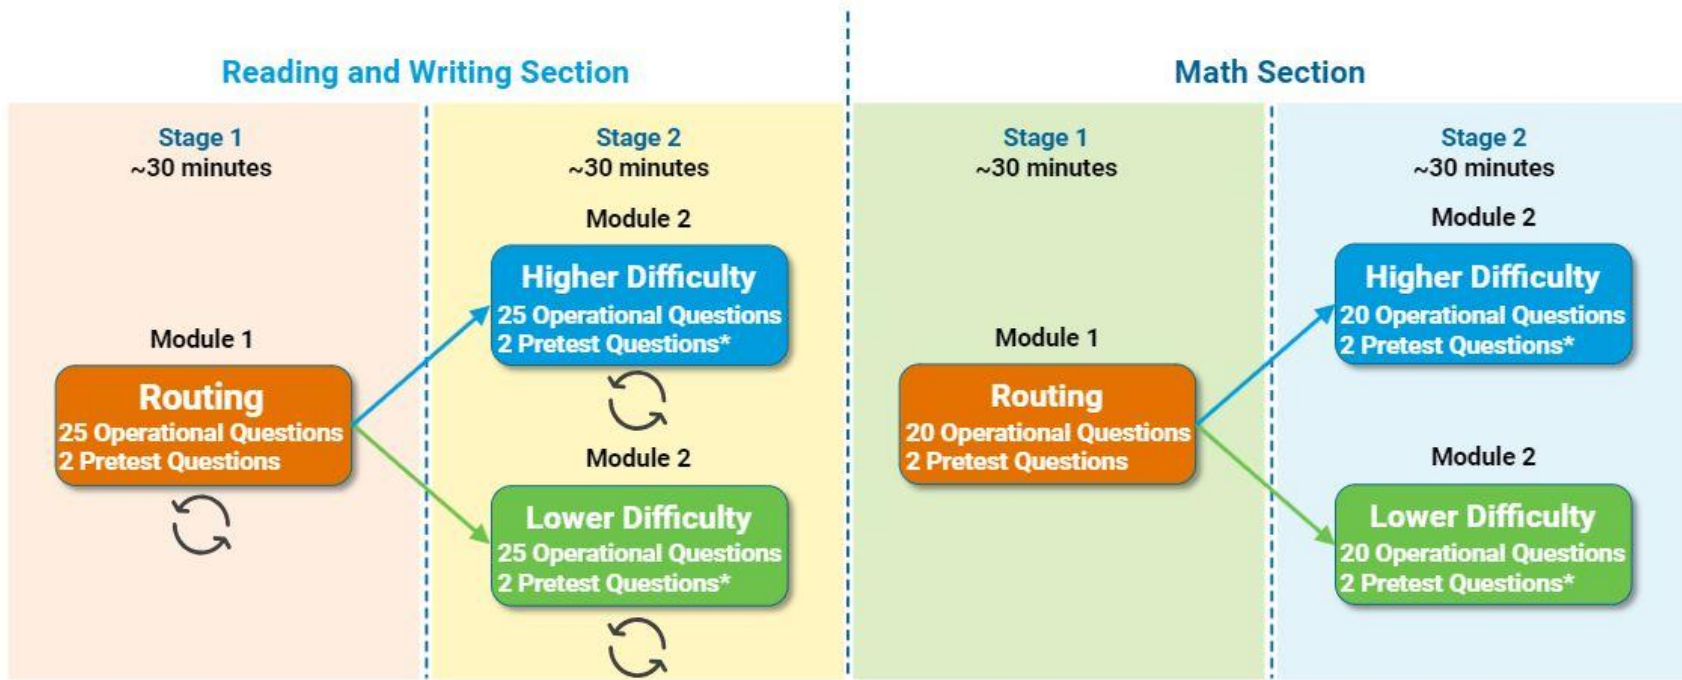

The digital SAT will have two modules in each section

Digital SAT Suite

Test Design A multistage adaptive test design with embedded pretesting.

* Stage 2 pretest questions unique, same pretest questions in higher and lower-difficulty modules

Bluebook Tools

Bluebook includes plenty of test tools for students. Here are some examples:

- **Mark for review:** You can flag and return to any question within a given test module that you want to come back to later.
- **Testing timer:** A clock counts down the time remaining in each module. You can hide the timer, and you get an alert when 5 minutes remain in the module. When there are only 5 minutes remaining, the clock can no longer be hidden.
- **Calculator:** A built-in Desmos graphing calculator is available for the entire Math section. The calculator is provided in the practice test on Bluebook to allow you to practice using the calculator before the test. (You can also bring your own acceptable calculator; please see psat.org/calculator for a full list.)
- **Reference sheet:** On the Math section, you have access to a list of common formulas.
- **Annotation:** You can highlight any part of a passage and leave yourself a note. This tool is only available for Reading and Writing questions.
- **Option eliminator:** If you think an answer option is wrong, you can cross it out.
